Restaurant Loyalty & Engagement System — Phase 1

1. Customer Login & Profile

- Login using mobile number with OTP verification.
- First-time users must enter their full name.
- No email or password required.
- Account is created instantly using phone number and name.
- Customer remains logged in on the same device.

2. Points System

- Staff enters the bill amount in the admin panel after payment.
- System automatically calculates and credits loyalty points.
- Example: ₹10 spent = 1 point.
- Points are credited in real time.
- Customer receives a WhatsApp confirmation with points earned and updated balance.

3. Rewards & Redemption

- Admin can create rewards such as:
    - Free Soft Drink — 150 points
    - Free Shawarma — 500 points
- Customers can view and redeem rewards from the app.
- Staff confirms the redemption in the admin panel.
- Points are deducted automatically after confirmation.
- Customer receives the reward item free or at a discount.

4. Bonus Points for Marketing Actions

- Customers can earn bonus points for:
    - Leaving a Google Maps review.
    - Following the restaurant's Instagram account.
- Deep links open the Google review page and Instagram profile directly.
- Customer confirms completion of the action.
- Admin can verify and approve bonus points.
- Helps increase Google reviews and Instagram followers.

5. Customer App Features

- View current points balance.
- View points transaction history.
- View available rewards and redeem them.
- Browse digital menu with photos, prices, and descriptions.
- View current offers, trending items, and seasonal specials.
- View personalized offers, if available.
- Access Google review and Instagram follow options for bonus points.

6. Admin Panel Features

Product & Menu Management

- Add, edit, and delete menu items.
- Manage product name, description, price, photo, and category.
- Mark products as Trending, New, or Seasonal.

Offer Management

- Create normal offers, seasonal offers, and limited-time deals.
- Launch 2x points campaigns.
- Apply campaigns to specific days, menu items, or seasons.
- Example: “Double points this weekend” or “Double points on chicken items.”

Customer Management

- View all registered customers.
- View customer name, phone number, total points, visit count, last visit date, and total spend.
- Track customer activity and loyalty status.

Analytics Dashboard

- Total registered customers.
- Repeat customer percentage.
- Top customers by visits and spending.
- Points issued vs. points redeemed.
- Customers inactive for 15, 30, and 45 days.
- Manual tracking for Google reviews and Instagram follower growth.

7. WhatsApp Automation

Automated WhatsApp messages for:

- Points credited after each purchase.
- Reward unlocked notification.
- New offer or seasonal campaign launch.
- 2x points campaign announcement.
- Inactive customer win-back messages.
- Food rating request after a visit.
- Birthday or special occasion messages, if date is available.

8. Advanced Campaign Tools

- Launch 2x points campaigns with one click.
- Target inactive customers with special offers.
- Create seasonal and festival-based offers.
- Run win-back campaigns for customers who have not visited recently.
- Send targeted WhatsApp campaigns to selected customer groups.

9. Business Benefits

- Converts one-time visitors into repeat customers.
- Builds customer loyalty through rewards.
- Creates a direct communication channel using WhatsApp.
- Increases Google reviews and Instagram followers.
- Provides customer insights for better business decisions.
- Reduces marketing effort through automation.

Core Value

A complete restaurant loyalty platform combining:

- Easy points and rewards system.
- Google and Instagram marketing support.
- WhatsApp automation.
- Customer analytics.
- Simple admin control.
